

Kailasam Sivalesh Reddy

Hyderabad, India | +91 70135-49895 | sivaleshkailasam@gmail.com

Senior Data Scientist - ML & AI

Senior Data Scientist with 4.5 years of experience architecting and delivering production ML/AI solutions across healthcare RCM, FinTech, and retail. Proven track record of owning the end-to-end ML lifecycle and translating ambiguous stakeholder needs into scalable, automated outcomes. Expertise in LLMs/GenAI, NLP, time-series forecasting, and high-impact automation pipelines.

CORE SKILLS

ML & AI: LLMs (Azure OpenAI, RAG, Agentic Systems), Deep Learning (TensorFlow, Keras), NLP, Time-Series Forecasting, Anomaly/Fraud Detection.	Languages & Data: Python, R, SQL, PySpark.
Cloud & MLOps: Azure (Machine Learning, AI Search, Databricks, Data Lake, OpenAI Service).	Tools: Power BI, Tableau, Git, Excel.

PROFESSIONAL EXPERIENCE

Primera Medical Technologies | Hyderabad, India

Data Scientist | Jan 2024 - Present

- **Architected and deployed** EOB & payer correspondence automation using OCR + NLP for document classification and extraction, improving the automation rate by **98%** and reducing turnaround time by **6 hours**.
- **Designed** a payment posting automation pipeline to convert paper EOBs to X12 835 formats for EPIC integration, reducing manual effort and driving posting accuracy to **90%**.
- **Spearheaded** ROI automation to process medical record requests via entity extraction and compliance checks, improving SLA adherence by **96%** with maintained auditability.
- **Developed** medical coding automation prototypes utilizing ICD/CPT suggestions and QA signals, reducing coding time by **82%**.
- **Partnered** with RCM operations, compliance, and engineering teams to define KPIs/SLAs and establish monitoring for extraction accuracy, improving production stability by **92%**.

HAPPAY | Bangalore, India

Data Scientist | Oct 2022 - Dec 2023

- **Built and scaled** a Transaction Intelligence system to identify fraudulent and duplicate submissions using rules and ML signals, reducing duplicate leakage by **60%**.
- **Engineered** fraud detection models and risk scoring frameworks to flag suspicious transactions, improving precision/recall and reducing false positives.
- **Developed** an augmented analytics engine utilizing GPT and NLP to capture client/business requirements, accelerating insight generation and reducing analysis turnaround time.

Landmark Group | Bangalore, India

Associate Data Scientist | Aug 2021 - Sep 2022

- **Built and deployed** production-grade demand forecasting models incorporating seasonality and promotions, achieving **79%** forecast accuracy.
- **Developed** combined Demand Forecast and Price Elasticity models for dynamic price optimization, achieving **83%** model accuracy and driving improvements in margin and revenue.

EDUCATION & AWARDS

Bachelor of Engineering, Electronics and Communication
PES University | 2017 - 2021

- **GEM Award**, Primera Medical Technologies (2025)
- **Best Performer of the Quarter** (Data Science Team), Landmark Group (2022)
